

**"ALONE", the music book and the ultimate solo guitar album
by Branco Stoysin**

Original compositions for solo, two, three and four guitars. An elixir for the heart, soul and ears.

Dedicated to the Sun, Nikola Tesla and all good things alone.

Three meters away from a very busy, air-polluted, noisy and vibrating A road, with over 30.000 of vehicles a day, frequent low and high flying jumbo-jets above which toxic trails together with dark clouds block the Sun, in a smallest studio, with no computer in sight, comes yet another Sun Recording's Sunny-side-of-guitar-and-music warm and quiet rapture giving release. How's this possible? Well, it is said that art/music depict society, true, (and that *art/music* also shape that society), but should be added, most importantly, the art/music depict artist's inner self..

The 2nd new music book, "ALONE", featuring the music as performed on the same title acclaimed ultimate solo-guitar album, which is included with the book.

The notations of 10 stunning original compositions by guitarist/composer Branco Stoysin, transcribed by the ear and a pen, and painstakingly calligraphically written over two years period. The book also features Branco's aphorisms and photos, and a concise bio of Nikola Tesla, Serbian born alone genius of the electricity, to whom the book is dedicated to, marking 160 years since the birth of Tesla and 120 years since the birth of modern civilization, The Niagara Falls and harnessing of Tesla's AC Polyphase system, the sole event that propelled the world to where it is today. And Tesla, who gave us the light, remains in the dark. Tesla made all the rolling world around us possible yet largely remains unknown and knowledge about Him forbidden! This is inhumane. Nothing else is so much taken for granted like the electricity and the exploited, denied, brilliant Man who gave it to us.

A segment from the book: ***"Every pylon everywhere in the world carries Tesla's blood, the electricity, to lighten your existence."***

The 3 minutes and 23 secs promo-video, where you will hear almost the entire track "Aurora Tesla" from the album, will enlighten you in a nicest and most concise way.

No Tesla no light, no nothing. No Sun no life.

Thank You.
