

The 15 year anniversary of the Sun Recordings label.

The 7th ultimate solo guitar album "ALONE" by guitarist/composer Branco Stoysin, 7 stunning new tracks alongside 3 favourites in a new light, the original music in its most pastoral, lyrical, evocative and tranquil...An elixir for heart and soul, and ears tired of all the noise and (imposed) audio pollution.

alone *adj. adv. 1. apart from another or others; solitary. 2. without anyone or anything else. 3. without equal; unique*

Have you ever wondered where are the tiny Sun Studio and Sun Recordings situated? On the Sunless island, in an amazing but noisy London town, three meters away from a very busy and noisy A road, a part of the South Circular. So you may now wonder how are our recordings so Sunny, pure, tranquil, pastoral, evocative and heart warming. Well the thing is, what matters is what's truly inside of a person, of an artist.

It is said that art depicts society, and artist's inner self too should be added, and nowadays most of the *art* is certainly either shallow or loud, aggressive or dark.

But art also could and should depicts the other side, a brighter side, one that certainly (co)exists deep and hidden, tranquil and beautiful...the side somewhat "forgotten or lost" or very much taken for granted.

The ultimate album, and a short movie, "ALONE" by guitarist/composer Branco Stoysin just might depict all of that. The album is dedicated to: The Sun, the gorgeous star that grant us life, (and Branco's prime inspiration), to Nikola Tesla, to all the good things alone and to all dear and lost souls. The album also marks the 70th anniversary since passing of the greatest, but inhumanly denied and "forgotten", Nikola Tesla, a Serbian born genius of electricity without whom there would be no light or civilised life we know of that most of us take for granted. Just try to imagine your life without the electricity. So the next time, you folks and all the hypocrites, see those beautiful pylons carrying Tesla's blood to your homes, lighting your existence, remember the great man that granted it to you.

This beautiful 6 page digi-pack album, reminiscence of "old fashioned" LPs, celebrates the Sun Recordings label's 15 year anniversary, eight releases in total (7 CDs and 1 DVD), summing up 50 original tracks released so far. On the album there's also a special tune written for Tesla. As a bonus the release include *Alone* short movie on a DVD, showcasing inspiration and creation. Indeed a very special release and occasion.

No Tesla no *light*, no nothing. No Sun no *life*.

Branco's motto: *And whispers from Sun flow into music...*And, please folks, Sun must be written with a capital S.

Sun Recordings, London. ***"A musical journey to warm the soul"*** Sarah Ward, Jazz FM.
